✉ xiaoyifeibupt@163.com · ☎ (+86) 152-1083-0587 · 🏠 <http://xiaoyifeibupt.github.io>

## 🔍 OBJECTIVE

---

- Software Development Engineer

## 🎓 EDUCATION

---

**Beijing Univ. of Posts and Telecommunications (BUPT)** 2013.9 – Present  
*Master student* in Computer Science and Technology (CS), expected March 2016

**Beijing Univ. of Posts and Telecommunications (BUPT)** 2009.9 – 2013.6  
*B.S.* in Information and Computing Sciences

## 👜 EXPERIENCE

---

**NetEase, Inc.** 2015.7 – 2015.8  
*Software Development Intern*

Brief introduction: Resurgence is a useful MySQL Proxy.

- Modified the model from Multithreaded to event-driven and Non-blocking IO.

**Samsung Communications Technology Research co., LTD** 2014.7 – 2015.4  
*Software Development Intern*

Brief introduction: ASR Auto Speech Recognition and NLU, Natural Language Understanding.

- Designed and implemented a part of the engine, which is a server for managing (control, monitor, communicate) the Process Unit and android application for the engine, so we can manage the Designed and implemented on mobile terminals

**Defect Testing System(DTS)** 2013.9 – 2015.7  
*Software Development(Java)* National 863 Project, studied with my tutor

Brief introduction: DTS is a set of testing tools, which is based on the software defect.

- Designed and implemented a defect mode() about C, by using the Javacc to create an AST (Abstract Syntax Tree) and scan the possible nodes
- Responsible for maintaining this System and fix some bugs in actual scene

**xhttpd, my http server** 2015.5 – Present  
*Linux C++* Individual Project, a simple http server, <https://github.com/xiaoyifeibupt/xhttpd>

- Designed and implemented by using event-driven, Non-blocking IO, one loop per thread model, epoll
- support for POST and GET method, CGI, Access to files and directories, Error processing(404)

**xMultiThread, my thread library** 2015.5 – Present  
*Linux C++* Individual Project, a simple thread library, <https://github.com/xiaoyifeibupt/xMultiThread>

- Designed and implemented by using RAII, support for MutexLock, Condition, BlockingQueue, CountdownLatch

## ⚙️ SKILLS

---

- Programming Languages: C++ > C > Java > Python
- Development: Network programming, Multithreaded programming

## ⚡ MISCELLANEOUS

---
